CONTENTS

Editors Note xi

ARTIFICIAL INTELLIGENCE/EXPERT SYSTEMS

Computer role in decision making in the year 2000
Johnson Aimie Edosomwan 1

Expert system and symbolic processing for automation
Ashok A. Grandhee and Raymond A. Moczadlo 6

IPSS: an approach towards automated decisions in CIM systems
Juan M. Sepulveda and Elden L. DePorter 11

The role of the industrial engineer in developing expert systems
Douglas S. Watts and Hamed Kamal Eldin 15

Application of expert systems to productivity measurement in companies/organizations
David J. Sumanth and Mehmet Dedeoglu 21

A microcomputer-based knowledge system for CAD software selection
Abu S. M. Masud and Bruce P. Kolarik 26

The development of a knowledge-based system for information systems project development consulting
Francis M. Lesusky, Robert L. Rhudy and John C. Wiginton 29

PWA_Planner - a rule based system for printed wiring assemblies process planning
Tien-Chien Chang and John Terwilliger, Jr 34

A novel structure of real-time expert control system for process industry
J. Jiang and R. Doraiswami 39

COMPUTERS IN PRODUCTION AND INVENTORY CONTROL

CIM includes the experimental shop
Harold Beckstrom, K. A. Ebeling and J. Stanislao 44

Modeling of computer and communication networks in flexible manufacturing
Biman K. Ghosh and Richard A. Wysk 49

Lot sizing in cellular manufacturing systems
R. Meenakshi Sundaram and R. M. Sundrarajan 55

A simulation model for evaluating centralized vs distributed inventory systems
Khalil F. Matta and Diptendu Sinha 61

Computerized ABC analysis: the basis for inventory management
Chao-Hsien Chu and Ying-Chan Chu 66

A decision support system for inventory management in high research & development environment
Boaz Ronen 71

Evaluating inventory turns for a hospital environment
Rajiv Kapur and Chris Moberg 73

Automating manual reward systems
Richard J. Keevan 78

A procedure for process monitoring based upon the CUSUM charting procedure: a microcomputer based solution technique for determining Markov chain stationary probabilities
Gary S. Wasserman 83

SYSTEMS PLANNING AND EVALUATION

Using integrated spreadsheets for production and facilities planning
Todd W. Lue 88

Manufacturing floor space forecasting
Paul J. Andrisani 92

Capacity planning in job-shop environment
Yasser A. Hosni and Ali Alsebaise 96

Industrial engineering spreadsheet applications from a manufacturing resource planning (MRP-II) system
John S. W. Fargher, Jr 100

Integrating manufacturing resources planning (MRP-II) with flexible manufacturing systems (FMS)
Howard W. Oden 107

Multiobjective decision making approach for determining alternate routing in a flexible manufacturing system
Sameer Gangan, Suresh K. Khator and A. J. G. Babu 112

Assessment of the strategies for effective implementation of computer integrated manufacturing systems (CIMS)
Silvanus Johnson Udoka and John W. Nazemetz 118

A decision support system for dynamic truck despatching
Marc Goetschalckx and Wendi Taylor 120

SYSTEMS IMPLEMENTATION AND EVALUATION

Computer-aided methodology for development of real-time control systems for synchronized manufacturing
W. Robert Terry, Harish Rao and David K. Handal 124

Using microcomputers to prototype CIM systems
Laurence E. Huber 129

Economic comparison of conventional and flexible manufacturing systems by simulation
V. Ramachandran and D. L. Kimbler 134

Mechanized material handling systems design and routing
A. Ravindran, B. L. Foote and Larry Williams 138

Use of simulation in the analysis of shop floor operations
Chris Stylianides, Gabe Radi and K. A. Ebeling 144

Computer aided engineering of automated guided vehicle systems
Marc Goetschalckx and Kathleen Henning 149

Development, operation, and testing of a heuristic line balancing program for a microcomputer
Dean B. Creech and Gary E. Whitehouse 153

A case study in the application of microcomputer technology in the construction industry
Edmond W. Carlson and William G. Carlson 156

SCHEDULING

Scheduling experiments on the space station
Theodore J. Sheskin 160

Computerised scheduling technique for productivity improvement
Hassan Elghobary and Tadros Aziz 165

Distributed short interval scheduling in a shop-floor network
Juan J. Diaz, Gabe Radi and K. A. Ebeling 170

Nurse staffing. Accurate information at the correct place and time
Halsey M. Bagg 175

ERGONOMIC AND HUMAN INTERFACE ISSUES

Modelling the human factors aspects of a computer-based text-graphics layout system
Cheickna Sylla and A. J. G. Babu 180

An experimental investigation of effects of highlighting displayed information
Paul Thacker and A. J. G. Babu 185

Comparison of displays for reduction of operator read error of barcoded production control data
Lissa Galbraith and A. J. G. Babu 190

EDUCATION ISSUES

Developing microcomputer software for CAD and CAM education
Tien-Chien Chang, Hsu-Pin Wang and Richard A. Wysk 194

Integrating microcomputers into the industrial engineering curriculum
Michael Branson, Terrence Beaumariage and Morteza Abtahi 199

Learning style as an influence on the effectiveness of self-paced computer-assisted instruction: preliminary results
Gary M. Kern and Khalil F. Matta 203

Dual database strategy and implementation
Chia-hao Chang and Thomas G. Steiner 208

Conceptual model of an integrated management information system incorporating industrial engineering techniques
Denise Ford Jackson 213

Microcomputer security
Sharon Cunningham 218

Developing a Disaster Recovery Plan (DRP) using a data base package
Sharon Cunningham 223

COMMUNICATIONS

The importance of a strategic plan in office information systems
Elden L. DePorter and Rosita M. Echols 230

How much does a LAN cost, really?
Dennis S. Mok 233

Internetworking topologies for local area networks: pros and cons
Mohammad Ilyas 237

Effects of message segmentation in tandem-node computer networks
Mohammad Ilyas and Peter J. Lamanna 242

SHOP FLOOR ISSUES

Collecting attribute data using voice recognition
Cynthia L. Morris and Gregory G. Riekhof 247

Continuous-time simulation of semi-orthogonal metal cutting on a lathe
Denise J. Crawford, Patricia A. S. Ralston and Thomas L. Ward 252

A compact programming environment for microprocessor-based controllers
Satoshi Uchida, Eiichi Kimura and Koutarou Mano 257

A computer simulation model for studying the performance of coordinate measuring machines
Ahmad K. Elshennawy and M. Nashat Fors 262

Group technology cell formation — some new insights
R. Meenakshi Sundaram and Shong-Shun Fu 267

MATHEMATICAL TECHNIQUES

An interactive micro-computer software for general three machines flow shop sequencing problems
A. K. M. Abdul Haq and F. A. Burney 277

Methodology for an orderly quadratic assignment problem
Cheickna Sylla and A. J. G. Babu 281

Karmarkar's projective method for linear programming: a computational survey
Mahesh H. Dodani and A. J. G. Babu 285

Linear programming software tools on UNIX system
Mitsuo Gen and Kenichi Ida 290

Using CAD/CAM for three-dimensional linear programming models
Linda A. Humphreys and Robert L. Williams 295

USING SPREADSHEETS

Practical guidelines for the design of menus
James M. Frazier and N. P. Cannon, Jr 300

A graphic identification procedure for an expert authoring system
Ramaswamy Ramesh and Cheickna Sylla 304

ERGONOMIC AND HUMAN INTERFACE ISSUES

Job evaluation by computer
Fred L. Eargle 309

Automated storage and retrieval of work standards
Richard A. Bihr 312

Spreadsheet application to labor determination
Silvia Kennedy and Juan R. Martinez 317

A knowledge-based system for assessment of human physiological abilities in manual lifting tasks
S. S. Asfour and A. M. Genaidy 319

Micro-industrialization. Application and management of the micro-computer
Greg D. Roberts 323

WORKPLACE DESIGN

Computerized work study approach to factory design
Hassan Elghobary, Abdellatif Haridi and Mohamed Naguib 327

Facilities planning and design with microcomputers
Hamid R. Parsaei and Louis J. Galbiati III 332

Three dimensional representation workplace diagram on a microcomputer
Khokiat Kengskool, Fred Swift and Hector Carrasco 336

ECONOMICS

Capital equipment justification:a spreadsheet application template
David L. Earnest 341

An engineering economy expression analyzer
Thomas Kisko 346

A graphics interface to an engineering economy program
Brad C. Meyer 351

COST CONTROL

Automating cost estimating systems
Sungyoul Lee and K. A. Ebeling 356

Capital tracking & project control
Peter H. Christian 361

Minimum annual revenue requirement analysis
Adedeji B. Badiru and David L. Russell 366

Reducing computer operating costs
Johnson Aimie Edosomwan 371

HAZARD AND BREAKDOWN MONITORING

Computing equipment downtime intervals and compiling a frequency table using dBASE III PLUS
Richard M. Schreiner 377

QUALITY ASSURANCE

The most economic setting for a uniformly shifting process
G. Allen Pugh 381

A statistical analysis tool for variation simulation modeling
Chin-Wen Lin 386

Information requirements of the quality assurance system
H. H. Elghobary and M. M. Kabil 392

The design of a user friendly interactive personal computer package for quality control charts, project management, and linear programming applications
Helmut T. Zwahlen and Mehmet Evrenol 397

INTEGRATING THE HUMAN INTO THE SYSTEM

Human-computer interaction in manufacturing
Ahmad K. Elshennawy and Chin H. Lee 402

Job characteristic perceptions of manual drafting and CADD: a field study of the effects ofcomputerization on drafting & design personnel
David E. Mandeville 406

Design and analysis of the cumulative intelligence medical-treatment (CIM) system
Yoshihiko Tanaka 411

Developing a methodology for using case mix information
R. Kent Boevers, Michael Branson and Chester Sidney Smith, Jr 416

Microcomputer applications in hospital management engineering
Justin A. Myrick and Thomas H. Bowlin 419

Selected microcomputer applications for hospital management engineers
Ruby Blasak and Andrew R. Ganti 422
